Masterclass in Pediatric Urogenital Reconstructive Surgery: DSD XX

28th-30th September 2017
BARCELONA (SPAIN)

Course Direction:
Department of Pediatric Surgery
Pediatric Urology Unit
Hospital Universitari Vall d'Hebron. Barcelona, Spain

DSD surgery is a field of great interest in pediatric urology, not only because of its complex surgical approach, but due to its psychosocial impact.

Our center has performed genital reconstructive surgery since Rafael Gosalbes Jordà founded our Pediatric Urology Unit. Therefore it's a privilege for us to invite you to participate in this first **Masterclass of Pediatric Reconstructive Urogenital Surgery**.

In this first edition we will focus on surgery of congenital adrenal hyperplasia or DSD XX, its diagnosis and different techniques like total or partial urogenital mobilization, laparoscopic assisted urogenital mobilization and anterior sagittal transrectal approach.

With the aim of thoroughly discuss indications and gain insight into details of the surgical technique we have assembled a renowned and experimental faculty of international surgeons.

The course is composed of a theoretical and practical modules, through live and pre-recorded surgeries and round tables. The last day we will have a panel of clinical cases contributed by the attendees, to share knowledge and debate those complex patients with the experts and the audience.
